Brendan Staley, Hunton Andrews Kurth, LLP
Mike Chernau, Senior County Attorney
Tim Davey, Timmons Group
Garrett Hart, Chesterfield Economic Development
Debbie Baicy, Chesterfield Account Department
Samantha Furnish, Chesterfield Economic Development

*via Teams

Danielle Fitz Hugh called the meeting to order at 3:07 pm and noted that a quorum was present for the Economic Development Authority meeting on April 16, 2026.

Briefing of the Authority:

Garrett Hart reported that the department is hosting two interns from the VCU School of Real Estate for a five-week internship program. The interns attended the Economic Development Authority meeting to gain exposure to the Authority's work and activities. Following an overview of the EDA's role and responsibilities, the interns provided brief introductions to the Authority members.

Approval of the Minutes:

Danielle Fitz Hugh requested that the Authority approve the minutes of the April 16, 2026, meeting. Robert Vaughn motioned to approve the meeting minutes as written. Jesse Calloway seconded, and all members present voted in the affirmative.

Financial Statements Update:

Debbie Baicy provided the April financial report, highlighting cash reserves and project funding.

Springline at District 60 Update:

Garrett Hart reported that construction activity at the Springline project has remained significant, although recent rain has temporarily slowed work. He noted that substantial progress has been made over the past month. Visible on the site is a large excavation area behind the hotel, which will be for the future parking deck. The project is scheduled for

completion and opening in May 2028. The hotel will be a full-service luxury property, featuring a variety of amenities and services beyond those typically found in a standard full-service hotel. Due to the extensive interior work required, including installation of finishes, fixtures, and amenities, the building may appear substantially complete from the exterior for many months before opening.

Construction is also progressing on the extended-stay hotel, which is anticipated to be completed by the end of next year.

Garrett reported that the prospective grocery store tenant has executed a Letter of Intent (LOI), and negotiations are currently focused on finalizing the lease agreement. Additional work is underway to address lease provisions and development documents, including customary retailer requirements related to exclusivity and competition restrictions. Garrett noted that the announcement will be made as soon as practicable, as securing the grocery store tenant is expected to impact leasing activity for the remainder of the development positively.

Meadowville Technology Park Update:

Tim Davey provided an update on activity in Meadowville, noting that despite weather-related challenges earlier in the year, project schedules have improved significantly. He stated that construction progress has advanced from behind schedule at the end of January and February due to excessive rainfall to ahead of schedule. Work is underway on Henricus Road and on the widening of Meadowville Technology Parkway, with substantial earthmoving and infrastructure work occurring throughout the area.

Tim indicated that Authority members will be invited to tour the site, likely in late June. The tour will provide members an opportunity to view the extensive manufacturing development underway, including the approximately 1.6-million-square-foot LEGO facility.

Tim also reported on the recent opening of The River Lofts apartment community, located across from the LEGO development area. Developed by George Emerson, the project was described as the highest-quality apartment community the developer has constructed, representing a significant investment per square foot. Tim noted that the property has experienced the fastest leasing rate of any apartment project the company has developed to date.

Tim stated that additional retail development is planned for the area adjacent to the property, further enhancing the mixed-use environment.

Upper Magnolia Green Update:

Tim Davey provided an update on the county's economic development and infrastructure initiatives, organized around three major grant awards received over the past three years. He reported that the first grant, totaling \$25 million, funded the engineering and design of water, sewer, and roadway infrastructure serving both the Google campus and the

adjacent pad-ready development site. The pad site has been fully designed and approved, with all required wetland permits secured, positioning the site for future development opportunities.

The second grant funded construction of the Duval Road realignment project, which will provide direct commercial access to the approximately 10-acre pad-ready site. Upon completion, improved access will enhance the county's ability to market the site to prospective businesses and investors.

The third grant provided \$13 million to construct portions of the Western Area Arterial Collector roadway, also known as the Powhite Parkway alignment. In addition, the county received a \$35 million TPOF grant award, accelerating roadway planning and requiring design work to advance the roadway from a two-lane to a four-lane configuration. Tim explained that the initial grant funding covered design, permitting, and mitigation activities, while subsequent grants have focused on construction.

He said staff are currently preparing an application for a fourth round of funding, which will be submitted in early June. Potential uses for the funds include additional roadway construction, long-lead infrastructure projects such as a water tank, and other supporting improvements necessary for future development.

Other Updates:

None

There being no further business, Robert Vaughn motioned to conclude the meeting at 3:46 pm. John Cogbill seconded, and all members present voted in the affirmative.

Respectfully submitted,

Samantha Furnish
Recording Secretary

Next Meeting: June 18, 2026, at 3 pm
